Seminar Series 2018 - 2019

Dr. Angeliki Martinou

DIC Joint Services Health Unit,
British Forces Cyprus

**“Mosquitoes without borders. Citizen science against
vector borne diseases”**

**Wednesday, 6 February 2019, at 17:00
Building CTF 01, Room 110, Panepistimioupoli Campus**

This seminar is open to the public

Mosquitoes are major vectors of pathogens and parasites that cause major diseases in humans and animals. The risk for emergence of new and resurgence of old mosquito borne diseases in Europe is now prevalent. This seminar aims to provide an introduction to the native mosquitoes and non-native mosquitoes in a Cypriot context and to discuss traditional and non-traditional methods of control. Can citizens help scientists against vector borne diseases? and how?
