

Lotus Learning Space

eLearning Solution

LOTUS LEARNING SPACE

Lotus Learning Space 5.0 is an e-learning technology platform that offers self-paced, collaborative and real-time capabilities, robust tracking and management and seamless integration of course content, all in one technology environment

Lotus Learning Space 5.0 brings new capabilities to e-learning, and provides a complete, Web-based system available for blended and collaborative learning. Lotus Learning Space 5.0 is an open, standards-based solution delivering enhancements around real-time collaboration, and for customers using Lotus Notes and Lotus Domino, it provides increased support of the Lotus Domino infrastructure.

FEATURES AND BENEFITS

Redesigned, Customizable Student Interface - Lotus LearningSpace 5.0 offers more pervasive, collaborative tools so students can easily chat with and send e-mail to classmates and instructors, strengthening the human element to the online learning experience

New Collaboration Features - Lotus LearningSpace 5.0 allows for the record and playback of live sessions so students never have to miss a valuable live session. Lotus LearningSpace 5.0 allows students to share documents and use e-mail launched within LearningSpace to contact classmates and instructors.

Enhanced Performance, Scalability - With added support for Windows 2000, Lotus LearningSpace 5.0 enables organizations to reach wider audiences than ever before by providing improved scalability and dependability over previous versions.

New Integration Tools Available - Lotus LearningSpace 5.0 delivers key customization features and tools which make it easier to create and deliver courses that take advantage of self-paced, collaborative, and live virtual classrooms in one course, when appropriate, and all in one system

Increased Support for Integration With Existing Lotus Domino Infrastructures - Lotus LearningSpace 5.0 is tightly integrated with Lotus Domino directories, and enables seamless coexistence of Lotus LearningSpace and Lotus Domino environments for easily managing student profiles and directory information.

QUICKSTART

The LearningSpace Quickstart is a great way to get started with the world's most advanced e-learning solution. In just days, you can have your LearningSpace solution set up and running successfully, your initial data migrated, and your learning support team trained to administer the system. Our experts bring a wealth of e-learning knowledge and experience to your implementation process.

We know how to deploy LearningSpace quickly and effectively, and we are ready to help you with your specific solution.

eLearning Solution

eLEARNING

e-Learning it's nothing more than a new mode to look at the learning process. In fact, the main elements are the same, what depends is the way of connecting and acknowledges of information. But using the IT infrastructure for e-Learning can give you some advantages: freedom to learn at the right time, and in the right place.

"We chose LearningSpace because we wanted our training program to be Web-based, and because it provides a complete e-learning solution that meets all our needs," recalls Mabel Casey, Herman Miller's Director of Customer Care and Training. *"The results with LearningSpace 4.0 have been tremendous,"* Casey says. *"Our dealers love the training".* - [Herman Miller](#)

"Siemens ICN saved \$800,000 in our first year and the students tested better. They tested better than in the classroom environment because they had time to assimilate the material and put it into real-world practice between Learning Server sessions." - [Siemens Virtual University](#)

"We found LearningSpace to be the most appealing distributed learning solution. And we haven't been disappointed with the results." - [Kennesaw State University](#)

THE FAMILY OF PRODUCTS

Lotus LearningSpace 5.0 is a Web-based application. Two key modules enable organizations to choose the functionality that best matches their needs.

- **Lotus LearningSpace 5.0 Core Module** uses active server page technology and relational database structures to support the delivery and tracking of online self-paced learning content. Self-paced courses can be highly structured with controlled paths and assessments built with the native planning tool.
- **Lotus LearningSpace 5.0 Collaboration Module** extensive collaborative learning capabilities that enable learners and instructors to work and learn together using discussion databases or real-time, virtual classrooms.
- **Lotus LearningSpace Forum** consists of five interdependent Domino databases that create a powerful e-learning environment for organizations using Domino. With LearningSpace Forum, instructors and training participants can take their classes with them and participate anytime or any place. Lotus LearningSpace Forum 3.01 (for a Domino 4.6x environment) and LearningSpace Forum 3.5 (for Domino R5) allow users to take advantage of Domino features such as disconnected use and database replication, document sharing, and threaded discussions.
