

BUSINESS AND CONSUMER SURVEYS

ECONOMICS RESEARCH CENTRE
UNIVERSITY OF CYPRUS

May 2017

SUMMARY

- In May 2017, economic sentiment in Cyprus increased as the Economic Sentiment Indicator (ESI-CypERC) rose by 2.3 points compared with April 2017. The increase was driven by confidence improvements in services, retail trade and among consumers.
- The Services Confidence Indicator rose as a result of more optimistic views expressed by firms regarding their past business situation as well as their past and expected demand.
- The Retail Trade Confidence Indicator increased marginally as the more favourable assessments of the volume of recent sales and stocks were almost offset by weaker sales expectations.
- The Construction Confidence Indicator decreased due to firms' downward revisions of future employment plans.
- The Industry Confidence Indicator declined mainly as a result of the downward revision of production expectations.
- The Consumer Confidence Indicator rose because of more optimistic responses regarding households' future financial situation, savings plans and the decline in unemployment over the next 12 months.

Note: The weights used in the calculation of the Economic Sentiment Indicator constructed by the Economics Research Centre (ESI CypERC) reflect the contribution of each sector to the GDP of Cyprus.

The Economics Research Centre of the University of Cyprus (CypERC) participates jointly with RAI Consultants Ltd in the Joint Harmonised European Union Programme of Business and Consumer Surveys. CypERC acknowledges funding from the European Commission and the Ministry of Finance for conducting the Business and Consumer Survey Project in Cyprus.

Notes:

¹ Positive responses refer to increase/improvement/ above normal/very or fairly likely, while the opposite holds for negative responses. Data are seasonally adjusted.

² The weights used in the calculation of the Economic Sentiment Indicator reflect the contribution of each sector to the GDP of Cyprus.

³ The calculation of the confidence (composite) indicator is described in http://ec.europa.eu/economy_finance/indicators/business_consumer_surveys/userguide_en.pdf.

⁴ The responses to this question are used in the calculation of the confidence (composite) indicator for each survey.

⁵ Following a suggestion by the European Commission, the responses to this question are not adjusted for seasonality.
