We, at the School of Economics and Management of the University of Cyprus, aim to provide world-class undergraduate and graduate education in economics and business with the ultimate purpose of improving lives. We aim to provide a vibrant and stimulating learning environment, where prominent researchers and the most promising students come together to exchange ideas and generate new knowledge, setting high standards for the future.

We are located at the capital of Cyprus, Nicosia and have our own premises at the University Campus. The School is one of the first three faculties to be established at the University of Cyprus in 1989, and admitted its first students through the national entrance examinations in 1992. Its first graduates entered the labour market in 1996. Since then, more than 5000 students graduated from one of the three Departments of the School, namely Department of Accounting and Finance, Department of Business and Public Administration, and Department of Economics. The TIMES Higher Education World University Rankings (2016), ranked UCy 55th in the top 150 Best Universities under 50 years old.

With around forty academics and more than fifteen administrative staff, it actively serves more than 1000 students, who are currently enrolled in its undergraduate and graduate programmes. The faculty recruits high calibre academics, the majority of whom are internationally renowned, bringing with them years of international experience in their field of expertise, including the 2010 Nobel Prize in Economics laureate, Professor Sir Christoforos Pissarides. All staff work together as a team, bringing about a wide range of perspectives and employing them for teaching, instruction, and problem-solving. The faculty vigorously pursues research projects and training in issues of unyielding regional and global significance.

The School has established strong links with the local industry, including the healthcare, pharmaceutical, telecommunications, tourism, banking and financial sectors and the public sector, including all Ministries, the Commission for the Protection of Competition, the Directorate General for European Programmes, Coordination and Development, and the Central Bank of Cyprus.

All of our programmes boast an innovative curriculum, hands-on learning, and rigorous analysis, while bridging theory and practice and fostering socially responsible behaviour. Completing any one of them, means that our graduates have acquired critical thinking, analytical, communication and interpersonal skills all along with motivation, strong work ethic and adaptability, gaining a competitive advantage in the most preferred qualities and skills of employees and entrepreneurs.

Accounting and Finance
By completing your studies at the Department of Accounting and Finance you will be equipped with the appropriate knowledge in accounting, auditing, tax, finance and Business law for rational decision making in the ever-changing international economic and business environment.

- Develop students’ critical thinking and analytical skills and enable them to apply various quantitative and computational methods and techniques in problem-solving.
- Promote the rigorous acquisition of theoretical and technical knowledge, enhance the awareness and significance of current trends in the professional field, embed the importance of adhering to a strict set of ethical standards and prepare students for a successful career in the fields of accounting, auditing, tax, and taxation, in audit firms, banks, public and other private organizations.
- Consolidate the knowledge of the theoretical framework and analytical methods needed to carry out financial activities in a wide range of organizations such as banks, insurance companies, brokerage firms, portfolio management agencies, industrial and commercial firms and government agencies.

Business and Public Administration
By choosing to study at our Department of Business and Public Administration, you will have the opportunity to gain knowledge and skills that will make you competitive in the job market and able to contribute with initiative, knowledge, and responsibility to the performance of firms and other organizations.

- Familiarize students with contemporary data and information analysis methods, the use of modern tools in problem solving and decision making, and the development of strategy.
- Develop their critical thinking and interpersonal skills to better manage the human capital of local and international organizations.
- Establish teamwork, personal initiative, and accountability as the key components of responsible organizational behaviour.

Economics
By joining our Department of Economics you will thrive as a student studying economic issues in depth and with independence of mind. We place emphasis on helping students develop strong analytical skills and acquire the ability to critically assess economic arguments.

- through a rigorous teaching program covering mainstream subjects based on contemporary methods of economic analysis, equip students with such qualifications for successful employment in Cyprus and abroad.
- train students to become high quality researchers of international standards for a career in research institutions, public policy organizations, and the private sector.
- infuse public debate with scientific methods and rigorous analysis and set the standards for the discussion of economic issues and appropriate economic policy decisions in Cyprus.
