### Ecology. Design. Synergy

The exhibition ECOLOGY.DESIGN.SYNERGY is the result of a collaboration between the ifa (Institute for foreign culture relations), and the AEDES Architecture Forum. The overarching vision of the exhibition was to detach the term "sustainability" from its common quantitative representation by highlighting the aspects of sustainability which can be experienced as qualities in themselves. Pulling lessons from projects, the exhibition represents efforts of Behnisch Architekten and Transsolar in assessing the qualitative aspects of sustainability which emerge through a sustainability focused integrated design process.

### Opening Hours

**Exhibition Opening:** Friday, 6<sup>th</sup> March 2015 at 18:00

**Dates:** 06 - 25 March 2015

**Opening Hours:** Monday - Friday: 10:00 - 18:00  
Saturday: 10:00 - 14:00

### Curator of Exhibition

Frank Ockert

### Symposium\_Round Table Discussion

Saturday, 7<sup>th</sup> March 2015  
Department of Architecture, UCY

**09:30: Welcome coffee**

**10:00: Exhibition presentation by the curator**

**11:00: Presentations:**

Charalambos Theopemptou, Lecturer, CUT  
Anthi Charalambous, Cyprus Energy Agency

**12:00: Round Table Discussion**

### Coordinators

Amilios Michael, Lecturer, Depart. of Architecture  
Andreas Savvides, Assistant Prof., Depart. of Architecture

### Film Screenings

**Menschen - Träume - Taten,**

Friday, 13<sup>th</sup> March 2015 at 18:00  
Duration: 90 minutes

**Algol,**

Friday, 20<sup>th</sup> March 2015 at 18:00  
Duration: 120 minutes

### Stefan Behnisch

Stefan Behnisch, born 1957, is the Founding Partner of Behnisch Architekten. He is a world-renowned advocate and educator of sustainable building design, and has lectured at conferences all over the world. Behnisch's goal - to connect the forces of human life and the natural environment - fuels the design of every commission his firm receives.

Since founding Behnisch, Behnisch & Partner in 1989 (now Behnisch Architekten), Stefan Behnisch has directed the design of dynamic, award-winning buildings that promote sustainability within the built environment. With a design portfolio that includes, master planning, public buildings, healthcare clinics, laboratories, sports facilities, redevelopment, offices, schools, universities, and museums, Behnisch strives to design inclusive buildings that provide maximum benefit to all users. His innovative approach to sustainable architecture is highly acknowledged in Europe, North America, and all over the world, and his buildings have been honored by prestigious institutions and industry organizations alike.
