

**Title:** Smart Eco-Districts SM ECO DIS

**Program duration:** 03-06-2020- 03-06-2021

**Principal Investigator:** Andreas Savvides

**Funding:** CLDC

**Budget:** €40.000 (UCY: €40.000)

**Affiliated organizations:** ΚΟΑΓ, ΠΑΚΕΠΕ

**Description:** The project concerns the creation of a model innovative project for the development of smart eco-cities in the areas of Kokkinotrimithia and Polemides. The main objective of the project is to draw up two model development and planning plans for the land to be built by the Cyprus Land Development Agency in these areas. In addition, the project includes an analysis of social housing parameters and an assessment of future needs, with the secondary aim of draw conclusions which may lead to a review of procedures and policies relating to the social housing sector in Cyprus.
