

MedSTACH project

Teaming for
Excellence

Eastern Mediterranean Science and Technology
Centre of Excellence for Archaeology and Cultural Heritage

Project MedSTACH aims to establish Cyprus as an excellence hub in **archaeology** and **cultural heritage** in the **Eastern Mediterranean region**, capitalising on multidisciplinary research and technological innovation.

Key Cypriot public academic institutions -- the Cyprus University of Technology and the University of Cyprus, along with relevant national policy makers and stakeholders -- the Department of Antiquities of Cyprus and the Cyprus Tourism Organisation, are teaming up with leading international academic and research institutions -- the University College London and the Foundation for Research and Technology, Hellas -- to lay the groundwork towards creating the Eastern Mediterranean Science and Technology Centre of Excellence for Archaeology and Cultural Heritage (**MedSTACH**).

MedSTACH will focus on the following Key Research Domains (KRDs), covering multiple facets of archaeological enquiry and cultural heritage priorities:

- **KRD-I: Heritage Exploration**
- **KRD-II: Spatial Analysis**
- **KRD-III: Heritage Protection**
- **KRD-IV: Material Characterization**

The above KRDs will be supported by and provide feedback to the Heritage Information and Communication Technologies (ICT) Unit.
