

## Constructing an Assessment Grid

As a group, choose a module currently being taught, or recently taught, by one of the group members. Develop an assessment grid for the module which relates the learning outcomes with the assessment of the module. Assign a percentage of the assessment for the module to each method of assessment chosen

Each sub-group are asked to write up their assessment grid on a piece of flipchart paper and present their grid and rationale to the whole group in a plenary session.

<b>Methods of assessment</b> <i>(across)</i> → <b>Learning Outcomes</b> <i>(down)</i> ↓	Method and % of total assessment	Method and % of total assessment	Method and % of total assessment	Method and % of total assessment
