Department of Economics

The Department aims to produce scientific knowledge of an international standard and to transfer this knowledge to its students. It offers a range of postgraduate programmes that cover the needs of students that are interested in entering the job market upon completion of their studies as well as those who are interested in continuing with a research career. Specifically, the Department offers the following postgraduate degrees:

- Master Degree in Economic Analysis (MECA)
 - Master in Business Economics TIME MBE (Technology Innovation Management and Entrepreneurship, offered in collaboration with the University of Crete.
 - Master in Behavioural Economics (MBEHEC)
-
- Ph.D. in Economics

Introduction

The science of Economics studies human behaviour and the organization of human societies. As individuals we continuously make decisions with economic repercussions. Some are minor, such as our daily transactions and our weekly groceries; whether to go out for dinner or coffee; if we are going to drive or take the bus to work. Others have important consequences in our lives: whether to go to college and what subject to study; how much to save and how and if we are going to accept an offer for a new job or stay with our current employer. Firms also have to make a lot of decisions such as what goods and services to produce; how much to invest; how many employees to hire and how much to pay them; and how much to invest in marketing and advertising. The third important party is the state, which makes decisions that affect our everyday lives as well as the long-term evolution of the economy. All these decisions by individuals, the firms and the state form our social and economic environment which determines our living standards.

Understanding the economic behaviour of the individual and the basic principles that govern the functioning of a modern economy allow economists to evaluate economic data and information correctly and to make rational decisions. With this knowledge the economics graduate can pursue a career in the civil service, regulatory bodies, banking, accountancy or consulting services. One can also choose to specialize in economic research and advance to an academic or research career. We strive to offer modern high quality graduate programmes that teach the state of the art in economics in order to allow graduates to successfully compete with the graduates of the best universities in the world.

Research

The Department of Economics covers a broad spectrum of research areas such as international trade, employment and migration, econometric theory, international finance, industrial organization, productivity, economic growth, experimental economics, political economy and microeconomic theory. Our staff members have links to some of the best research centers and universities in the world and participate in important international research networks. Our key goal is the production of high quality research for publication in the best international scientific journals.

Resources and facilities

The University Library offers students access to all the important scientific journals as well as a large number of books. Students also have access to the computer labs of the School of Economics and Management which are equipped with state of the art hardware and software, including statistical

packages. The School also provides access to several international databases as well as data on the Cypriot economy that can be used by students in their research projects or theses. In this environment graduate students can study and acquire all the necessary skills needed for a successful career.

Admission Requirements

In addition to the requirements described in the relevant Admission and Attendance Regulations, candidates for the graduate studies programme are required to have a grade of 550 in the TOEFL examinations or 213 in the TOEFL computer-based format exam or B in the GCE O-Level examinations or an equivalent qualification demonstrating sufficient knowledge of the English language (by previously obtaining a degree from an accredited U.K. or U.S. academic institution, for instance).

In addition to the requirements described in the relevant Admission and Attendance Regulations, candidates for the graduate studies programme whose first language is not English are required to provide proof of proficiency in English in one of the following ways:

1. G.C.E. O-Level English with a minimum grade "C".
2. I.G.C.S.E. English with a minimum grade "C".
3. I.E.L.T.S. minimum average score 6.5.
4. T.O.E.F.L. with a minimum score of 550 (Paper-based) or T.O.E.F.L. with a minimum score 213 (Computer-based) or T.O.E.F.L. (Internet based) with a minimum score 92.
5. Cambridge English First (FCE), with a minimum score 176.
6. Cambridge English Advanced (CAE), with a minimum score 176.
7. Cambridge English Proficiency (CPE), with a minimum score 176.
8. Certificate of Proficiency in English (ECPE), with a minimum score 650.
9. Anglia Examinations – Proficiency (C1).
10. IB diploma (International Baccalaureate).
11. Certificate of success in the exams conducted by the Ministry of Education and Culture.
12. Certificate of success in year 6th final exams, of the Cyprus State Institutes of Further Education.
13. Any other equivalent exam that will prove proficiency in English language.
14. Candidates who hold a degree from a recognized university programme taught in English are considered to have proficiency in English.

For more information on applications to join the graduate programme of economics, please refer to the Admission and Attendance Regulations – Application Procedures.

Our programmes are open to students without an undergraduate degree in economics. All programmes have been designed to accommodate students of diverse backgrounds, particularly students in technical fields such as mathematics, statistics and mechanics.

Master's Programmes

1. Master in Economic Analysis (MECA)

Provides rigorous training in economic theory and econometrics. It is suitable for students interested in working as economic analysts both in the public and in the private sector, as well as for those interested in continuing their studies to obtain a Ph.D. in Economics. The language of instruction is English.

2. Master in Business Economics (TIME MBE)

The TIME (Technology Innovation Management and Entrepreneurship) Masters in Business Economics (MBE) is a full-time 15-month Master's programme in Business Economics (MBE) which is offered in collaboration with the University of Crete. It offers a curriculum, that combines targeted classroom and practical training to provide students with the knowledge and the entrepreneurial skills, needed to successfully manage innovative organizations in an ever-changing environment, by offering an integrated curriculum.

3. Master in Behavioural Economics (MBEHEC)

The Master in Behavioural Economics provides students with a general grounding in behavioural and experimental approaches to social sciences and policy design. It is suitable for students interested in working and applying behavioural insights in both the public and private sector, as well as for those interested in continuing their studies in behavioural science at the doctoral level. The language of instruction is English.

General Programme Structure

The normal duration of all programmes for full-time students is three semesters. The maximum time allowed for completion of a degree is eight semesters. The language of instruction for all programmes is English.

All Master Degrees are awarded upon successful completion of at least 90 ECTS in graduate courses with the exception of the TIME MBE program which requires 105 ECTS. Courses are separated into two categories: required and elective courses. Required courses give essential background in key areas and elective courses give students the opportunity to specialize in their area of interest. Required courses for each Master's programme are described below.

Master's Thesis

(ECO 698 – 24 ECTS, MMFE)

(ECO 699 – 30 ECTS, MECA)

(ECO 697 – 30 ECTS, MBEHEC)

(MBE5500 – 30 ECTS, MBE)

The thesis should demonstrate in-depth knowledge of a particular topic and should contain original research elements. The thesis is presented to students and faculty and is evaluated independently by the student's advisor and a member of staff with similar research interests appointed by the Departmental Committee of Graduate Studies. If work on the thesis extends beyond one semester, students can register in ECO 600 Continuation of Master Thesis (1 ECTS) / MBE5501 Continuation of Master Thesis (0 ECTS) for at most two subsequent semesters.

MASTER IN ECONOMIC ANALYSIS (MECA)

For the Master Degree in Economic Analysis, the requirement is twelve courses or eight courses plus a Master's thesis. It provides rigorous training in economic theory and econometrics. It is suitable for

students interested in working as economic analysts or in continuing their studies for a Ph.D. The language of instruction is English.

First Semester	ECTS
ECO 601 Microeconomic Analysis I	7.5
ECO 602 Macroeconomic Analysis I	7.5
ECO 603 Statistics and Econometrics I	7.5
ECO 604 Analytical Methods in Economics	7.5

Second Semester

ECO 651 Microeconomic Analysis II (ECO 601)	7.5
ECO 652 Macroeconomic Analysis II (ECO 602)	7.5
ECO 653 Statistics and Econometrics II (ECO 603)	7.5

Note: The courses in brackets are prerequisites

One of the following:

ECO 605 International Trade	7.5
ECO 606 International Finance	7.5
ECO 610 Money, Banking and Financial Economics	7.5
ECO 611 Labour Economics	7.5
ECO 612 Industrial Organisation and Policy	7.5
ECO 613 Public Economics	7.5
ECO 644 The Economics of Firm Financing	7.5
ECO 664 Analysis of Economic and Financial Data	7.5
ECO 673 Applied Microeconometrics	7.5
ECO 680 Applied Financial Econometrics	7.5
ECO688 Current Topics in Economic Research I	7.5
ECO788 Current Topics in Economic Research II	7.5

Third Semester

ECO 699 Master's Thesis	or	30
-------------------------	-----------	----

Four courses from the above list (4 courses X 7.5 ects)

Notes:

- 1. Students may replace an Elective Course with a graduate course offered by other University Departments, subject to approval from the Departmental Board.*
- 2. Students may replace an Elective Course with an advanced undergraduate course offered by other University Departments, subject to approval from the Departmental Board.*

MASTER IN BEHAVIOURAL ECONOMICS (MBehEc)

For the Master in Behavioural Economics the requirement is eight courses plus a Master's thesis. It provides students with a general grounding in behavioural and experimental approaches to social sciences and policy design. It is suitable for students interested in working and applying behavioural insights in both the public and private sector, as well as for those interested in continuing their studies in behavioural science at the doctoral level. The language of instruction is English.

	ECTS
Required Courses	60
First Semester	
ECO 661 Microeconomics	7.5
ECO 665 Behavioural and Experimental Economics	7.5
<i>One of the following four*:</i>	
ECO 663 Econometrics	7.5
ECO 664 Analysis of Economic and Financial Data	7.5
PSY 604 Multivariate Statistics for the Behavioural Sciences	7.5
PSY 789 Applied Data Analysis I	7.5
<i>One of the following two:</i>	
PSY 713 Experimental Methods in Psychology	7.5
PSY 641 Epistemology and Research Design in the Social Sciences	7.5
Second Semester	
PSY 608 Attention and Perception	7.5
PSY 640 Social Influences and Social Representations	7.5
ECO 675 Behavioural Insights for Policy	7.5
<i>One of the following two:</i>	
PSY 731 Cognitive Neuroscience	7.5
PSY 719 Topics in Neuroscience	7.5
Third Semester	
Master's Thesis	30

*ECO 664 is the course they will typically be offered and suggested to the students. In cases this course is not possible to be offered, students with some background in economics can take ECO663 and those with no such background can take PSY604 or PSY789 as alternates.

MASTER IN BUSINESS ECONOMICS - TIME (Technology Innovation Management and Entrepreneurship)

The TIME (Technology Innovation Management and Entrepreneurship) Masters in Business Economics (MBE) is a full-time 15-month Master's programme in Business Economics (MBE) which is offered in collaboration with the University of Crete. It offers a curriculum, that combines targeted classroom and practical training to provide students with the knowledge and the entrepreneurial skills, needed to successfully manage innovative organizations in an ever-changing environment, by offering an integrated curriculum.

TIME MBE is a full-time 15th month program with 105 ECTS needed for a successful completion. All courses are required.

The program consists of three different components:

1. The Academic Modules (September – May, 60 ECTS)
2. The Summer Practicum (May – July, 15 ECTS) A Supervised Summer Internship
3. The Master Thesis (May – December, 30 ECTS)

First Semester	ECTS
MBE5101 Business Economics	4.0
MBE5102 Economics of Innovation and R&D Spending	4.0
MBE5103 Data Analytics and Quantitative Methods	4.0
MBE5104 Behavioral Economics	4.0
MBE5204 Financial Management for Innovative Firms	3.0
MBE5206 Firm Performance Evaluation	4.0
MBE5306 New Technology Ventures	3.0
Second Semester	
MBE5201 Finance & Accounting for Decision Making	4.0
MBE5202 Marketing & Management for Innovative Firms	4.0
MBE5203 Competitive Decision Making and Negotiations	3.0
MBE5205 Global Economic Challenges	4.0
MBE5301 Strategy for R&D Intensive Firms	4.0
MBE5302 Decision Making for Innovative Ventures	4.0
MBE5303 Intellectual Property Rights and Technology Transfer	4.0
MBE5304 Use of Innovation and Knowledge in R&D Intensive Firms	4.0
MBE5305 Skills for Small Firm Development	3.0
Summer Semester	
MBE5400 Internship	15
Third Semester	
MBE5500 Master Thesis	30

DOCTORAL PROGRAMME

The goal of the Ph.D. Programme in Economics is to provide training to individuals to become high quality researchers in line with international standards. Our aim is for our graduates to be able to successfully compete for employment at Universities, research institutions, public policy organizations, and the private sector. In addition to this, it aims at creating a dynamic research community at the University of Cyprus that will also raise the level of economic research in Cyprus and will infuse public debate on economic policy with scientific methods and rigorous analysis.

Admission Requirements

The minimum requirements for admission to the Ph.D. Programme are:

1. A research-oriented Master's Degree in Economics (similar in structure to the Master in Economic Analysis) and a strong background in Microeconomics, Macroeconomics and Econometrics.
2. Very good command of the English language. This can be certified in one of the following ways:
 1. G.C.E. O-Level English with a minimum grade "C".
 2. I.G.C.S.E. English with a minimum grade "C".
 3. I.E.L.T.S. minimum average score 6.5.
 4. T.O.E.F.L. with a minimum score of 550 (Paper-based) or T.O.E.F.L. with a minimum score 213 (Computer-based) or T.O.E.F.L. (Internet based) with a minimum score 92.
 5. Cambridge English First (FCE), with a minimum score 176.
 6. Cambridge English Advanced (CAE), with a minimum score 176.
 7. Cambridge English Proficiency (CPE), with a minimum score 176.
 8. Certificate of Proficiency in English (ECPE), with a minimum score 650.
 9. Anglia Examinations – Proficiency (C1).
 10. IB diploma (International Baccalaureate).
 11. Certificate of success in the exams conducted by the Ministry of Education and Culture.
 12. Certificate of success in year 6th final exams, of the Cyprus State Institutes of Further Education.
 13. Any other equivalent exam that will prove proficiency in English language.
 14. Candidates who hold a degree from a recognized university programme taught in English are considered to have proficiency in English.

Evaluation of applications is done by the Departmental Committee of Graduate Studies, based on applicants' performance in their undergraduate and postgraduate studies. Applicants may be called for an interview if this is deemed necessary. The Committee submits their recommendation to the Departmental Council, which has the final say on offering a position in the programme.

The Committee prepares individual curriculums for each student accepted. This will ensure that all students have the necessary skills and knowledge to proceed to the research stage of their programme.

Programme Structure

The Ph.D. programme requires the completion of 240 ECTS. The teaching part of the Ph.D. program is 90 ECTS and the research part 150 ECTS. The main stages of the programme are the following:

A. Coursework - Comprehensive Examinations

During the first two semesters, the students take two core courses in each of the three core areas of Economic Theory: Microeconomics, Macroeconomics and Econometrics, as well as one course of Analytical Methods and one course on Current Topics of Economic Research. During the third semester, students take one more course on Current Topics of Economic Research and three field courses that give them the opportunity to acquire expertise in the research area they are interested in. Depending on course availability, a student might take some field courses during the fourth semester. Moreover, during the fourth semester, students are also expected to write a research paper, which must contain original research.

To be eligible for admission to take the comprehensive exam, a student needs to achieve an average grade of at least 6.5/10 in the 6 core courses of the first year of the curriculum (Microeconomics, Macroeconomics and Statistics and Econometrics) without failing any class. Students cannot repeat classes in order to improve their grades. However, the Department's Committee of Graduate Studies can, in exceptional circumstances, allow students who have failed one class to repeat it.

The second important step before entering the research stage of the programme is for a student to succeed in the comprehensive exam. For the comprehensive exam to take place, the student must first reach a mutual agreement with a faculty member who will agree to become the student's main Advisor. The exam is expected to take place before the end of the fourth semester of studies, and for sure not later than the seventh semester of studies (as specified by the University of Cyprus rules).

The comprehensive exam consists of a written and an oral examination focused on topics related to the research area the student plans to work on. Typically, the examined material consists of a series of relevant academic papers that the student needs to study and understand in depth. These papers are chosen by the student's Advisor.

The exam is administered by a three-member committee, which is usually consisted of faculty members of the Department and one of them is the student's Advisor. The committee is also responsible for the timing of the exam which should ensure that it takes place within the required time frame. The three-member committee is appointed by the Departmental Council after a suggestion from the Department's Committee of Graduate Studies and the student's Advisor. The exam is graded with a pass or fail. A student who fails the exam will have to repeat it during the following semester (and no later than the end of the seventh semester of studies).

B. Specialization - Submission of Research Proposal

The first milestone of the programme's research stage is the submission of the Research Proposal. The student is expected to demonstrate the ability to study a new subject in an original way and his/her knowledge of the appropriate research methods. She/he is also expected to present some supportive preliminary results. The procedure regarding the presentation of the research proposal is determined by the rules of postgraduate studies of the University.

Students are required to have prepared and successfully defended their research proposal by the end of their third year of studies, including the time spent in the coursework stage. A necessary requirement is that the proposal is defended between two and four semesters after the student has succeeded in the comprehensive exam.

The committee examining the Research Proposal consists of three members proposed by the student's Advisor and appointed by the Departmental Council after a suggestion from the Department's Committee of Graduate Studies and the student's Advisor. The committee is chaired by the student's Advisor. One of

the members of the Committee could be an academic from another department of the University of Cyprus or an academic from another university or research center.

C. Research - Submission of Dissertation and Thesis Defense

Upon succeeding in defending the Research Proposal, the student will conduct original research under the guidance of his/her Advisor. This research should be oriented in leading towards the writing of the student's Doctoral Dissertation. When the student considers the Dissertation to be completed, and upon the approval of the Advisor, he/she should submit it to the Department and start preparing for its subsequent public presentation. The submission of a Doctoral Dissertation and its subsequent public presentation may be completed at the earliest during the sixth semester of the student's enrolment in the Ph.D. programme. The Doctoral Dissertation needs to be submitted at the latest during the first month of the final semester of studies.

The Thesis Defence is conducted according to the relevant rules of the University of Cyprus. The candidate presents the Dissertation in an open lecture, with duration 30-45 minutes, before a five-member Examining Committee. During the Thesis Defence, the candidate gives a brief oral summary and answers questions on the content and results of the Ph.D. Thesis. The candidates are expected to defend the Thesis, demonstrate its originality and justify deviations from previous results in the literature.

The five-member Examining Committee is set up by the Departmental Council at the suggestion of the Department's Committee of Graduate Studies and the student's Advisor. The Examining Committee is made up of three members of the Department's faculty, one of which is always the student's Advisor and they are typically the same members that examined the student's research proposal, and two external members. The Chair of the Examining Committee is a member of the Department's faculty, but not the student's Advisor.

Detailed information regarding the Rules of Postgraduate Studies can be found in the webpage of the Graduate School. For more information on Attendance Regulations of Postgraduate Studies please consult the Graduate School (tel.: 22894044).

Credit for Previous Coursework

Admitted students can have the opportunity to transfer credits from similar classes taken in other universities. It is possible to transfer up to 60 ECTS (roughly equivalent to one year of coursework), upon approval from the Departmental Committee of Graduate Studies. Thus, all students admitted directly to the Ph.D. Programme are required to take at least some of the relevant graduate-level courses (with a minimum of 30 ECTS). Students cannot be exempted from the comprehensive exam.

Required Courses	ECTS
ECO 601 Microeconomic Analysis I	7.5
ECO 602 Macroeconomic Analysis I	7.5
ECO 603 Statistics and Econometrics I	7.5
ECO 604 Analytical Methods in Economics	7.5
ECO 651 Microeconomic Analysis II (Prerequisite ECO 601 - 7.5 ECTS)	7.5
ECO 652 Macroeconomic Analysis II (Prerequisite ECO 602 - 7.5 ECTS)	7.5
ECO 653 Statistics and Econometrics II (Prerequisite ECO603 - 7.5 ECTS)	7.5

ECO 688 Current Topics in Economic Research I	7.5
ECO 788 Current Topics in Economic Research II	7.5

Elective Courses

ECO 605 International Trade	7.5
ECO 606 International Finance	7.5
ECO 610 Money, Banking and Financial Economics	7.5
ECO 611 Labour Economics	7.5
ECO 612 Industrial Organisation and Policy	7.5
ECO 613 Public Economics	7.5
ECO 644 The Economics of Firm Financing	7.5
ECO 664 Analysis of Economic and Financial Data	7.5
ECO 665 Behavioural and Experimental Economics	7.5
ECO 673 Applied Micro Econometrics	7.5
ECO 680 Applied Financial Econometrics	7.5

Notes:

1. Students may replace up to two Elective Courses with graduate courses offered by other University Departments, subject to approval from the Departmental Council.
2. Students may replace up to one Elective Course with an advance undergraduate course offered by another University Department, subject to approval from the Departmental Council.
3. Any course considered by the Departmental Council to have low attendance can be taught as a Reading Course or as an Independent Study (ECO 693 and ECO 696). Students cannot select more than two Reading Courses.

Guidance

The Director of Graduate Studies is responsible for guiding doctoral students from the time of admission up to the selection of a research advisor. The research advisor follows each student's progress in research and other tasks, and provides the necessary guidance.

Research Stage

Students who pass their comprehensive examinations have the following additional responsibilities in each semester of their research and writing stages:

- a) They are required to attend in each semester at least 80% of the seminars of the Departmental Seminar Series and of the School's Brownbag Seminar Series. Attendance is confirmed by a faculty member who needs to sign the relevant document at the end of the seminar.
- b) They are required to present once a semester in the Departmental Seminar Series. (Students signed up for 15 ECTS research stage are exempt from this requirement).

The Director of Graduate Studies will be responsible for overseeing doctoral students' completion of these requirements.

Financial Support for Doctoral Students

The department makes every effort to ensure that doctoral students have enough income to allow them to live independently. This is accomplished mainly through their employment as teaching assistants. The Department also awards some grants and scholarships, while students can also secure employment as research assistants.

Course Descriptions

ECO 601 Microeconomic Analysis I (7.5 ECTS)

Rigorous study of market structures (Perfect Competition, Monopoly, Monopolistic Competition and Oligopoly), Theory of Distribution under Perfect and Imperfect Competition, Capital Theory and introduction on general equilibrium and welfare economics. Depending on the course duration, the course will proceed with a rigorous treatment of production functions, cost functions and duality.

ECO 602 Macroeconomic Analysis I (7.5 ECTS)

The course will introduce students to the foundations and methodology of dynamic macroeconomic theory and main classes of macroeconomic models, with a review of useful mathematical tools such as dynamic programming and optimal control as well as relevant empirical methods. The objective is to deepen the understanding of aggregate fluctuations, as well as the role of economic policy.

ECO 603 Statistics and Econometrics I (7.5 ECTS)

Probability Theory. Random Sample. Regression, Prediction and related notions. The Linear (Normal) Regression Model: Estimation, Hypothesis Testing, Misspecification Testing. Generalized Linear Regression. Elements of Time-Series. Heteroskedasticity and Autocorrelation. Dynamic Linear Regression. Nonlinear Regression. Multivariate Regression Systems. The Simultaneous-Equation Model. Generalized Method of Moments. Limited Dependent Variables. Panel Data Models.

ECO 604 Analytical Methods in Economics (7.5 ECTS)

Economic Modelling and Equilibrium Analysis. Linear Models and Matrix Algebra. Comparative Static Analysis. Constrained and Unconstrained Optimization Methods. Dynamic Methods in Continuous and Discrete Time.

ECO 605 International Trade (7.5 ECTS)

The course analyzes the traditional trade theory as well as the “new trade theory.” The first part of the course covers absolute and comparative advantage as well as the Heckscher-Ohlin model. The second part examines optimal tariffs in situations where countries have market power and strategically interact with each other. These methods are used to examine economic integration at both the regional and global levels.

ECO 606 International Finance (7.5 ECTS)

Introduction to the main open questions of International Macroeconomics. Introduction to basic open economy inter-temporal models and the determinants of the current account. Review of the properties of the international business cycle with the goal of understanding international co-movement of macroeconomic variables. A look at international relative prices with the goal of understanding the degree of segmentation of markets across countries. A review of the main factors and mechanisms driving economic crises with a focus on the role of and inter-relation between international capital flows, credit

expansions, real estate bubbles, overconsumption and the sovereign, and a look at macro-prudential and other policies that can be used to limit the frequency and consequences of such crises.

ECO 610 Money, Banking and Financial Economics (7.5 ECTS)

This course examines financial markets and institutions. We analyze recent research developments in financial markets (such as bonds, stocks and foreign exchange) and financial institutions (banks, insurance companies, mutual funds, etc.). Topics to be covered will be chosen from the following: financial markets, financial institutions, the financial system, prices and exchange rates, money and bond markets, interest rates, inflation, stocks, bonds, portfolio choice, European economic convergence, and others.

ECO 611 Labour Economics (7.5 ECTS)

This course begins by examining static and dynamic theories of the demand for and supply of labour as well as their interaction in the context of the competitive paradigm. Emphasis is placed on econometric methods for the empirical implementation of these models. Studies of wage outcomes and apparent deviations from the competitive norm are then considered. A number of non-competitive labour market models are reviewed as well as empirical attempts to discriminate amongst them. The course ends with an examination of issues relating to possible failure of the labour market to clear, e.g., wage rigidity and unemployment.

ECO 612 Industrial Organization and Policy (7.5 ECTS)

Industrial Organization is concerned with the study of imperfectly competitive markets. The course aims to develop an understanding of competitive interaction in such markets; to introduce the empirical methods used to analyze them; and to outline the basic policy principles that govern their operation. Indicative topics include estimation of supply and demand, estimation of cost and production functions, monopoly regulation, oligopoly models, collusion and cartels, mergers, product differentiation, barriers to entry.

ECO 613 Public Economics (7.5 ECTS)

This course examines the effects of fiscal policy on the economy through taxation and public expenditure from both positive and normative points of view. Both positive and normative aspects of public policy are examined in relation to issues like the role of the state, the taxation of goods and services, the effect of taxation on labour supply and savings, the taxation of company profits and its effects on corporate finance and investment and the incidence of taxes. Also examined from the public expenditure point of view are topics on market imperfection such as public goods, externalities and social insurance. In several topics reference is made to the public sector in Cyprus and conclusions drawn from empirical analysis are presented.

ECO 644 The Economics of Firm Financing (7.5 ECTS)

The course examines among other topics the valuation of a firm's financial condition, bond, stock and option valuation, the trade-off between risk and return, valuation of investment projects, creating value for shareholders, global financial markets and their impact on raising long-term capital, establishing a target capital structure and dividend policy.

ECO 651 Microeconomic Analysis II (7.5 ECTS)

This course continues the analysis of the principles of microeconomic theory. The first part studies individual behavior in the presence of uncertainty. The second part serves as an introduction to general equilibrium theory and its extensions, and discusses the theorems of welfare economics. The analysis covers both pure exchange economies and economies in which production is available and introduces the notion of the core of an economy. The third part focuses on problems of asymmetric information.

ECO 652 Macroeconomic Analysis II (7.5 ECTS)

Analytical approach to basic macroeconomic models with finite and infinite horizons in discrete and continuous time. Introduction to Real Business Cycle and International Real Business Cycle Models. Endogenous Growth Theory with emphasis on R&D-based Models and International Technology Diffusion.

ECO 653 Statistics and Econometrics II (7.5 ECTS)

Basics of Probability and Statistics, the bootstrap, generalized method of moments, endogeneity, Simultaneous Equation Models, Limited Dependent Variables, Panel Data Models, Nonparametric Density Estimation, Nonparametric Regression Estimation.

ECO 661 Microeconomic Analysis (7.5 ECTS)

The course will begin with a review of the classic theories of consumer and producer behavior and proceed to the description of basic market structures and the analysis of factor markets. It will then lay out the basic principles of game theory under conditions of both complete and incomplete information. These will be the tools for the analysis of topics in modern microeconomic theory such as bargaining auctions, moral hazard and adverse selection.

ECO 662 Macroeconomic Analysis (7.5 ECTS)

The primary objective of this course is to help students understand the functioning of the macroeconomy as the aggregate outcome of the actions of heterogeneous agents. The course presents and analyzes macroeconomic models that can help us understand the behaviour of macroeconomic variables and their responses to policy shocks. The course includes an in-depth discussion of a number of concepts and topics in the area of macroeconomics, including economic expectations and monetary policy.

ECO 663 Econometrics (7.5 ECTS)

Probability Theory. Random Sample. Regression, Prediction and related notions. The Linear (Normal) Regression Model: Estimation, Hypothesis Testing, Misspecification Testing. Generalized Linear Regression. Elements of Time-Series. Heteroskedasticity and Autocorrelation. Dynamic Linear Regression. Nonlinear Regression. Multivariate Regression Systems. The Simultaneous-Equation Model. Generalized Method of Moments. Limited Dependent Variables. Panel Data Models.

ECO 664 Data Analysis in Economics and Finance (7.5 ECTS)

The purpose of this course is enabling students to collect economic data from databases and subsequently be able to analyze them with aid of specialized statistical and econometric software.

ECO 665 Behavioural and Experimental Economics (7.5 ECTS)

By the end of the course students should understand how findings from psychology can inform standard economic theory in order to develop better models of economic behaviour. Students should also become familiar with the use of experimental methods and the analysis of experimental data for the study of economic behaviour.

ECO 673 Applied Microeconometrics (7.5 ECTS)

Brief review of the classical linear regression model. Econometric models for cross-section data and time-series data. Economic applications and the use of specialized econometric software are emphasized. Topics will be drawn from: 1) models of multiple equations, 2) models of limited dependent variables, 3) elements of time-series analysis and models for macro and financial data.

ECO 675 Behavioural Insights for Policy (7.5 ECTS)

Understanding the ways in which findings of behavioral sciences can help in better policy design by public institutions and other bodies, and in the systematic study of the impact of such policies on the society.

ECO 680 Applied Financial Econometrics (7.5 ECTS)

Financial Time Series and their characteristics; Conditional Heteroskedastic Models; Nonlinear Models and their applications; Continuous-time Models and their applications; Risk Management, Extreme Values, Quantile Estimation and Value at Risk; Estimation and tests of Asset Pricing Models, Multivariate Volatility Models; High-frequency Data Analysis and Market Microstructure.

ECO 688 Current Topics in Economic Research I (7.5 ECTS)

The class is divided into two parts. In the first part the most important topics in current economic research will be presented and analyzed. In the second part students will choose a field to focus on and present and systematically analyze the relevant literature and produce the relevant reports.

ECO 691 Placement in Financial Organizations (7.5 ECTS)

(Prerequisites: Successful completion of the compulsory courses of the 1st semester of the academic studies and at least 30 ECTS of the corresponding academic program that the student attends. Selection Criteria: Selection is based on the academic achievement of the student in the previous semester with minimum grade point average 6 /10 and the criteria set by the firm/organization.)

The objective of the placement in organizations is to enable students to acquire practical experience and applied knowledge in sectors or departments related to monetary and financial economics. Also, students will have the opportunity to develop communication and other skills.

ECO788 Current Topics in Economic Research II (7.5 ECTS)

The class is divided into two parts. In the first part the most important topics in current economic research will be presented and analyzed. In the second part students will choose a field to focus on and present and systematically analyze the relevant literature and produce the relevant reports.

Research Interests of the Academic Staff

- **Elena Andreou, Professor**

Financial Econometrics, Time Series Econometrics

- **Eleni Aristodemou, Assistant Professor**

Theoretical and Applied Econometrics

Applied Industrial Organization

- **Andri Chassamboulli, Associate Professor**

Search and Matching, Immigration, Macroeconomics, Labor Economics

- **Louis Christofides, Emeritus Professor**

Labour Economics, Macroeconomics, Applied Econometrics.

- **Sofronis Clerides, Professor**

Industrial organisation, applied microeconomics and international trade.

- **Panayiota Flori – Lyssioutou, Associate Professor**

Public Economics; Labour Economics; Applied microeconomics and microeconometrics; Interhousehold and intrahousehold behavior

- **Costas Hadjiyiannis, Associate Professor**

International Trade, Game Theory, Industrial Organisation, Microeconomics.

- **Christis Hassapis, Associate Professor**

Macroeconomics and Banking International Finance.

- **Ioannis Kasparis, Associate Professor**

Time Series Econometrics, Specification Testing, Asymptotic Statistical Theory

- **Andros Kourtellos, Professor**

Econometrics, Socioeconomic Inequality and Mobility, Economic Growth, Macroeconomics, Forecasting

- **Philippos Louis, Assistant Professor**

Game Theory, Experimental Economics, Institutional and Market Design, Organisational Economics

- **Theofanis P. Mamuneas, Professor**

Applied Microeconomics and Econometrics and Public Economics; Infrastructures, R&D Spillovers and Productivity; Growth.

- **Michael S. Michael, Emeritus Professor**

International Trade, Environmental Economics, Public Economics

- **Christoforos Pissarides, Professor**

Macroeconomics, Especially Search Theory, Unemployment, Growth and Structural Change.

- **Nicos Theodoropoulos, Associate Professor**

Labour Economics, Econometrics.

- **Andreas Tryphonides, Assistant Professor**

Applied and Quantitative Macroeconomics, Econometrics

- **Nikolaos Tsakas, Associate Professor**

Microeconomic Theory, Political Economy, Experimental Economics, Information Economics, Social and Economic Networks, Industrial Organization.

- **Dimitrios Xefferis, Associate Professor**

Political Economics, Social Choice, Applied Game Theory, Microeconomic Theory.

- **Marios Zachariadis, Professor**

Macroeconomics, Open Economy Macroeconomics, Economic Growth.

- **Nicholas Ziros, Associate Professor**

Microeconomic theory, General equilibrium theory
