

Elective Courses

Primary school teachers and Pre-primary school teachers must complete at least 15 ECTS (three courses from two different faculties). The Senate of the University of Cyprus decided that only one course of the first level of foreign language can count as elective course or the student may successfully complete the second level of the same language. In this case, both levels can count as elective courses.

Foreign Language

In addition to the above courses, students are required to complete 10 ECTS in a foreign language.
