

Course Title	Topics in Morphology and Syntax				
Course Code	ENG 260-269				
Course Type	Compulsory for Linguistics / Elective for Literature and Translation				
Level	Undergraduate				
Year / Semester	2 <sup>nd</sup> year / 4 <sup>th</sup> semester				
Teacher's Name	Kleanthes K. Grohmann				
ECTS	5	Lectures / week	2	Laboratories / week	N/A
Course Purpose and Objectives	This cluster of courses aims to provide students with the opportunity to concentrate in theoretical aspects of English grammar. Courses offered in these Topics examine the internal structure of English words and the rules by which word formation takes place (morphology) as well as constituents and rules involved in sentence formation (syntax). The cluster may also investigate the relationship between syntax and morphology by considering the effects that some morphological processes have on syntax (morphosyntax). It explores further the phrase structure properties of English, different clause types, and movement operations.				
Learning Outcomes	Students are expected to have developed full awareness of English grammar in word form (morphology) and sentence structure (syntax). They will also have gained an understanding of core theoretical concepts for both.				
Prerequisites	ENG 241	Required	N/A		
Course Content	<p>An indicative list of topics covered by this cluster of courses includes:</p> <ul style="list-style-type: none"> <li>▪ Morphemes and allomorphy</li> <li>▪ Inflectional morphology</li> <li>▪ Derivational morphology</li> <li>▪ Compounding and other word formation</li> <li>▪ Raising, Control, and Empty Categories</li> <li>▪ Ellipsis and discourse in grammar</li> <li>▪ Topics in Binding Theory</li> <li>▪ Issues in Morphosyntax</li> </ul>				
Teaching Methodology	English grammar will be presented to non-native students with emphasis on modern theory. Introducing aspects of English grammar is followed by ways of capturing their properties theoretically. In-class exercises will support students follow this conceptual transition.
