

Teaching, Testing & Translation Lab (TTT-Lab)

Managing team: Dr Spyros Armostis, Dr Georgios Floros & Dr Sviatlana Karpava

The Lab consists of workstations equipped with the latest software programmes that enable students to

- enhance their ability to use technology and tools for teaching purposes, curriculum and course design, lesson planning and classroom management as well as active research,
- get acquainted with electronic tools that support the design and administration of language tests,
- work with oral and written corpora, information and communication technology (online resources, presentation software, virtual learning environments),
- conduct research regarding teaching material design, Computer Assisted Language Learning (CALL), teacher development, language testing and assessment as well as translation for their own projects both at BA and MA level (take-home and final exams, theses),
- get acquainted with Computer Assisted Translation (CAT)-tools such as translation memories and online terminological databases,
- exercise their skills in translation-related software such as subtitling software and digital text-processing tools,
- keep up with the latest developments in machine translation.

Access to the Lab is provided to all students who take relevant compulsory and elective courses in the Theoretical & Applied Linguistics section and the Translation Studies section of the BA programme of the Department of English Studies, as well as to all MA students of Linguistics, TESOL and Translation.

You can follow the activities of the TTT-Lab also through the [Teaching, Testing and Translation Team@Department of English Studies Facebook site](#).
