

BUSINESS AND CONSUMER SURVEYS

October 2022

Summary

- In October 2022, economic sentiment in Cyprus improved as the Economic Sentiment Indicator (ESI-CypERC) increased by 0.4 points compared with September 2022. The marginal increase in the ESI-CypERC was driven by confidence gains in services and retail trade.
- The Services Confidence Indicator rose for the second month in a row, mainly as a result of more optimistic views on turnover over the next three months.
- The increase in the Retail Trade Confidence Indicator was due to improved assessments of past sales and stock levels, and upward revisions in sales expectations.
- The drop in the Construction Confidence Indicator was driven by the deterioration in firms' assessments of the current levels of order books.
- The Industry Confidence Indicator decreased owing to downward revisions in production expectations.
- The decline in the Consumer Confidence Indicator resulted from a deterioration in most of its components (three out of four). In October, consumers assessed their recent financial situation less favourably and revised their expectations about the future economic conditions in Cyprus downwards. Moreover, consumers' intentions to make major purchases weakened in October.
- In October, economic uncertainty in Cyprus remained broadly stable at around the level registered in September. Uncertainty in retail trade, construction and manufacturing rose, while uncertainty in services remained almost unchanged at the levels seen in August and September. Uncertainty among consumers declined slightly in October, but is still at a relatively high level.

Notes: ¹ ESI (CypERC): the weights used in the calculation of the Indicator reflect the contribution of each sector to the GDP of Cyprus.

² GDP growth: GDP (in real terms, adjusted for seasonality and working days) is compared to the same quarter of the previous year (Source: Statistical Service of Cyprus).

The Economics Research Centre of the University of Cyprus (CypERC) and RAI Consultants Ltd participate in the Joint Harmonised European Union Programme of Business and Consumer Surveys. CypERC acknowledges funding from the European Union, the Ministry of Finance and the University of Cyprus for conducting the project "Business and Consumer Surveys" in Cyprus.

Savings intentions, next 12 months	-35	-36	-31	-39	-35	-37	-40	-48	-48	-43	-47	-41	-49
Statement on the current financial condition of household	15	15	16	16	13	15	14	12	12	13	14	11	9
Uncertainty: difficulty predicting household's financial situation ^{5, 6}	1	-1	-1	4	-2	10	6	9	16	13	1	15	11

Notes: ¹ The balance is the difference between the percentage of positive responses and the percentage of negative responses. Positive responses refer to "increase", "improvement", "above normal", "very likely", "fairly likely", etc., while negative responses refer to "decrease", "deterioration", "below normal", "not at all likely", "not likely", etc. Data are seasonally adjusted. ² The calculation of the Indicator is described in https://ec.europa.eu/info/sites/default/files/bcs_user_guide.pdf; however, the weights used in the calculation reflect the contribution of each sector to the GDP of Cyprus. ³ The Confidence Indicator is described in https://ec.europa.eu/info/sites/default/files/bcs_user_guide.pdf. ⁴ The responses to this question are used in the calculation of the Confidence Indicator for each survey. ⁵ The responses to this question are not adjusted for seasonality. ⁶ The balance is the difference between the percentage of respondents who state that the future business situation (or household financial situation) is difficult to predict, and the percentage of respondents who state the opposite.
