FortiClient SSL VPN Installation and Setup Guide for **Android** devices.

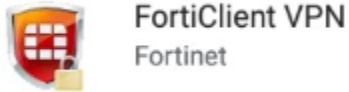

Note:

Please make sure to uninstall Checkpoint VPN Client before installing FortiClient.

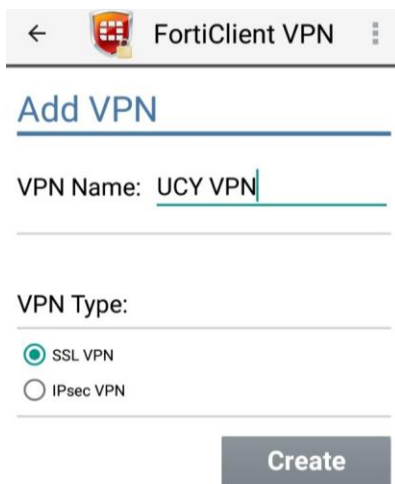

1. Download FortiClient from Play Store.

2. Open the application, and click on **New VPN**.

3. Insert VPN Name: **UCY VPN** , and choose VPN Type: **SSL VPN**.

- Click on **Server**, and type **sslvpn.ucy.ac.cy**

- You can now see UCY VPN Connection:

Note: If you device is not connected to the Internet, the Connect button is disabled.

- Click on **Connect**, and insert your username and password. You can now see your connection info:

Note: You cannot connect to UCY VPN if your computer is already connected to UCY's wired or wireless network.
