CALLS FOR TENDERS

TITLE AND DESCRIPTION OF THE TENDER	DEADLINE
<p>“Study on using millimetre waves (mm waves) bands for the deployment of the 5G ecosystem in the Union” - SMART 2017/0015 This invitation to tender aims to support the Commission in assessing the impacts of technical harmonisation of high-priority mm wave bands (including the 26 GHz, 32 GHz and 40 GHz bands) in support of the 5GAP. It will put particular scrutiny on incumbent services (such as satellite or fixed wireless) and their coexistence with new 5G terrestrial services in terms of aggregate socio-economic benefits and costs.</p> <p>Eligible applicants: All natural and legal persons coming within the scope of the Treaties.</p>	25/08/2017
<p>More information: https://etendering.ted.europa.eu/cft/cft-display.html?cftId=2216 (2017/S 118-236108)</p>	
<p>“Modelling and simulation methodologies for coalition operations research MODSIMMET” - 17.CAT.OP.032 This invitation to tender covers a study concerning the analysis and acquisition of better understanding in the derivation of the increasing benefit of the application of data farming and war gaming supported by artificial intelligence in the application to coalition operations research. The dynamic interaction among friendly, adversary, and other forces as a critical element of C2 representation has to be researched through these methodologies. It has to be well understood and analysed in order to help the operational decision makers rapidly examine and evaluate large amounts of information with regard to complex situations and with several interdependencies and an increasing number of parameters that are difficult to handle without the support of specific methodologies.</p> <p>Eligible applicants: All natural and legal persons coming within the scope of the Treaties.</p>	27/09/2017
<p>More information: https://etendering.ted.europa.eu/cft/cft-display.html?cftId=2596 (2017/S 118-236096)</p>	

PARTNER SEARCHES

PROGRAMME	TITLE OF THE PROJECT/ DESCRIPTION	COORDINATOR	DEADLINE
LIFE	<p>“Layered Green Wall” The project aim is to create useful tool in the area of small green architecture. Layered Green Wall is a self-supporting, layered metal-wood or full metal construction with an appropriately planted set of plants designed on a bipolar basis. It provides a friendly climate for users, especially in dry and hot climate. Due to conditions of bipolar rule of implementation of the plants on the construction two types of plants can be used. The facility using a layered green wall can be an educational hub for citizens. A vertical urban garden can provide its residents with useful plants. Partners sought: Local governments, enterprises, organisations active in the area of small green architecture.</p>	Poznan University of Life Sciences Poland	expression of interest 30/06/2017 submission September 2017
COSME	<p>The project already funded by COSME aims to expand its partnership for a transnational network of rural touristic routes structured in several hiking itineraries across Europe. Hiking Europe addresses the issue of tourism diversification in European regions that have traditionally focused on mass tourism but are willing to commit with a more sustainable, responsible and high-quality alternative approach based in less explored areas, specifically in rural locations. Partners sought: EU Regions / Municipalities, Regional Development Agencies, etc.</p>	Regional Development Agency of the Dubrovnik-Neretva County DUNEAL LLC. Croatia	expression of interest June 2018
